Body Diameter:

8.000 inches

Body Length:

9.960 inches

Body Width:

8.000 inches

End Application:

Remote operating station

Drive Type:

Gear

Duty Cycle:

Variable

Mounting Facility:

Unthreaded mounting holes

Product Name:

Remote operating station

Special Features:

Assembly comprises of twenty (20) distinct parts; major parts are (1) housing flange, (1) housing sleeve, (1) indicator flange, (1) indicator spindle, (1) output gear shaft, (1) input gear shaft, (1) thrust washer, (1) indicator plate, (1) indicator arm, (1) flange, (2) woodruff key, and other standard hardware items

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A30500
