Body Material:

Steel, corrosion resisting

Mounting Provision:

Threaded mounting holes

Bore Diameter:

4.000 inches

End Application:

WATE-RD-IST-RIBU

Mounting Provision Arrangement Style:

Single hole

Integral Valve Operation Method:

Pneumatic

First Piston Rod End Style:

External threaded

Mounting Type And Location:

Screw cylinder head end

Product Name:

Cylinder, air

Special Features:

Used as vertical motion of monitor at pneumatic monitor. Provided with 4.000 inch diameter x 4.500 inch stroke for lateral motion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A34200
