Overall Length:

2.690 inches

Body Width:

1.500 inches

Body Thickness:

0.250 inches

End Application:

Seawolf class submarine ssn 23. Rov/package & module cradle assembly.

Link Style:

Raised face ends

Body Construction:

Solid

Product Name:

Link shaft

Special Features:

Large end of link is 0.80 thickness with hole diameter 0.875-20 unef-2b, small end of link is 0.25 thickness with hole diameter 0.500-13unc-2b.

Material:

Copper alloy

Material Specification:

Qq-c-450 aly-614 tem-soft federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A52410
