End Application:

F-22 raptor

Product Name:

Adapter straight flange input coupling

Special Features:

Material is primarily titanium with some steel components. Item connects to pto shaft center tube on one end and is bolted to the emad (engine side) on the flange end. Assembly contains a ball and socket which requires replacing every 1, 000 flight hours. Item transmits the axial load through the shaft which occurs from the thermal cycling of the engine.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
