Core Diameter:

2.52 inches

Casing Material:

Aluminum alloy and steel, stainless

Core Rotation Direction:

Counterclockwise

Product Name:

Incremental optical encoder

Special Features:

Shaft diameter: 3/8 inches; shaft material: : 416 stainless steel; bearing housing: die cast aluminum with protective finish; stainless steel; cover: die cast aluminum; stainless steel; rpm: : 12, 000 rpm ; weight: 13 oz typical; voltage/output: 28v/5: line driver, 5-28 vdc in, vout = 5 vdc

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T246-e
