Overall Width:

Between 1.9950 inches and 2.0000 inches

Overall Outside Diameter:

Between 1.9950 inches and 2.0000 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Nonlocating

Special Features:

1.4365 in. Min 1.4375 in. Maximum shaft diameter and two 0.2500 in. Holes equally spaced through outer ring and one corner outer ring beveled 0.062 in. Deep on 30 degrees angle and bearing consists of outer ring, retainer and rollers only

Material:

Steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
