Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Load Direction:

Radial

Bore Shape:

Straight

Internal Clearance:

0.0015 inches radial and 0.0030 inches radial and 0.0080 inches axial and 0.0150 inches axial

Standard Tolerance Designation:

Abec no.5

Special Features:

Puller groove on od of inner ring and id of outer ring, on same side; split inner ring; bore and od parco lubrized; silver plated retainer

Material:

Steel outer ring

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
