Overall Width:

Between 2.4503 inches and 2.4803 inches

Bore Diameter:

Between 2.1651 inches and 2.1654 inches

Overall Outside Diameter:

Between 3.9367 inches and 3.9370 inches

Stack Arrangement:

3 angular contact bearings, 2 tandem mtd, 1 reversed

Special Features:

Stabilized for operation from m65 degrees f to p300 degrees f, assy relationship marking (v) on od of bearing elements, same ser no.

Permanently marked on all bearing elements

Material:

Steel comp e52100 outer ring

Material Specification:

Fed-std-66, federal standard single material response inner ring

Style Designator:

Stack

Test Data Document:

21335-aps-33 specification (includes engineering type bulletins, brochures, etc., that reflect specification type data in specification format; excludes commercial catalogs, industry directories, and similar trade publications, reflecting general type data on certain environmental and performance requirements and test conditions that are shown as "typical", "average", "", etc.). And 21335-aps-36a specification (includes engineering type bulletins, brochures, etc., that reflect specification type data in specification format; excludes commercial catalogs, industry directories, and similar trade publications, reflecting general type data on certain environmental and performance requirements and test conditions that are shown as "typical", "average", "", etc.). And 38443-aes-1a05 specification (includes engineering type bulletins, brochures, etc., that reflect specification type data in specification format; excludes commercial catalogs, industry directories, and similar trade publications, reflecting general type data on certain environmental and performance requirements and test conditions that are shown as "typical", "average", "", etc.). And 38443-aes-10a9 specification (includes engineering type bulletins, brochures, etc., that reflect specification type data in specification format; excludes commercial catalogs, industry directories, and similar trade publications, reflecting general type data on certain environmental and performance requirements and test conditions that are shown as "typical", "average", "", etc.).
