**Overall Width:**

Between 0.8650 inches and 0.8750 inches

**Bore Diameter:**

Between 18.9980 inches and 19.0000 inches

**Overall Outside Diameter:**

Between 20.8730 inches and 20.8750 inches

**Surface Finish:**

Ground

**Retainer Fabrication Method:**

Machined

**Bore Shape:**

Straight

**Locating Feature:**

Nonlocating

**Internal Clearance:**

0.0110 inches radial and 0.0130 inches radial

**Special Features:**

Magnetic particle inspection, all hardened parts

**Material:**

Steel comp e52100 roller

**Material Specification:**

66 federal standard single material response outer ring

**Style Designator:**

Single row, non-locating, two lip inner ring, cylindrical outer ring, separable

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A044a0
