Overall Width:

Between 0.8650 inches and 0.8750 inches

Bore Diameter:

Between 18.9980 inches and 19.0000 inches

Overall Outside Diameter:

Between 20.8730 inches and 20.8750 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Nonlocating

Internal Clearance:

0.0110 inches radial and 0.0130 inches radial

Special Features:

Magnetic particle inspection, all hardened parts

Material:

Steel comp e52100 roller

Material Specification:

66 federal standard single material response outer ring

Style Designator:

Single row, non-locating, two lip inner ring, cylindrical outer ring, separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
