Overall Width:

Between 0.9900 inches and 1.0000 inches

Bore Diameter:

Between 2.0000 inches and 2.0006 inches

Overall Outside Diameter:

Between 2.3750 inches and 2.3755 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Alignment Type:

Rigid

Standard Tolerance Designation:

Afbma standard tolerance for industrial needle bearings

Material:

Steel roller

Material Specification:

Low carbon, 34995 mfr ref 1st material response outer ring

Style Designator:

Non-separable, open end, drawn shell

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
