Overall Width:

Between 2.4950 inches and 2.5000 inches

Bore Diameter:

Between 58.4980 inches and 58.5000 inches

Overall Outside Diameter:

Between 64.4980 inches and 64.5000 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Pressed

Load Direction:

Radial

Bore Shape:

Straight

Internal Fit-up Designation:

Standard

Material:

Steel comp e52100 outer ring

Material Specification:

66 federal standard single material response outer ring

Style Designator:

4 point ball contact, split inner and outer rings, separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
