Overall Width:

Between 0.7430 inches and 0.7480 inches

Bore Diameter:

Between 1.3778 inches and 1.3780 inches

Overall Outside Diameter:

Between 2.8343 inches and 2.8346 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Nonlocating

Internal Clearance:

0.0004 inches radial and 0.0010 inches radial

Standard Tolerance Designation:

Rbec no.5

Product Name:

Roller bearing

Special Features:

Silver plate cage per ams2412 0.001-0.002 thk. Contact points permissible except on land riding surf and roller pockets. Bake at 475-500f to check for bond

Material:

Steel roller

Material Specification:

Pwa-725, 97497 mfr ref 3rd material response roller

Precious Material:

Silver

Style Designator:

Single row, non-locating, two lip inner ring, cylindrical outer ring, separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
