Overall Width:

Between 3.3875 inches and 3.3900 inches

Bore Diameter:

Between 2.3745 inches and 2.3750 inches

Overall Outside Diameter:

Between 4.1126 inches and 4.1132 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Nonlocating

Special Features:

Bearing does not have outer ring; silver plate retainer 0.0005-0.0015 thk per ams2412

Material:

Steel comp e52100 roller

Material Specification:

Ams 6444 assn standard single material response roller

Style Designator:

Cylindrical inner ring, cylindrical outer ring, separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
