Overall Width:

Between 0.7450 inches and 0.7500 inches

Bore Diameter:

Between 0.6258 inches and 0.6267 inches

Overall Outside Diameter:

Between 1.1245 inches and 1.1250 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Alignment Type:

Rigid

Special Features:

Max roller diameter variation in any one bearing 0.0001 in.

Material:

Steel roller

Material Specification:

Fed-std 66 federal standard single material response roller

Style Designator:

Non-separable, with roller retainer, hardened and ground

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
