Overall Width:

Between 0.7037 inches and 0.7087 inches

Bore Diameter:

Between 1.5746 inches and 1.5748 inches

Overall Outside Diameter:

Between 3.0997 inches and 3.1000 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Nonlocating

Internal Clearance:

0.0008 inches radial and 0.0020 inches radial

Standard Tolerance Designation:

Rbec no.5

Special Features:

Bearing heat stabilized for operation at 400 degrees f, inner ring w/retainer and rollers, and outer ring furnished as a matched set

Material:

Steel comp e52100 roller

Style Designator:

Single row, non-locating, two lip inner ring, cylindrical outer ring, separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
