Cylindrical Roller Bearing - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/3110-00-571-9413

## Overall Width:

Between 0.7037 inches and 0.7087 inches

## Bore Diameter:

Between 1.5746 inches and 1.5748 inches
Overall Outside Diameter:
Between 3.0997 inches and 3.1000 inches

## Surface Finish:

Ground

## Retainer Fabrication Method:

Machined
Bore Shape:
Straight
Locating Feature:
Nonlocating
Internal Clearance:
0.0008 inches radial and 0.0020 inches radial

Standard Tolerance Designation:
Rbec no. 5

## Special Features:

Bearing heat stablized for operation at 400 degrees $\mathfrak{f}$, inner ring w/retainer and rollers, and outer ring furnished as a matched set

## Material:

Steel comp e52100 roller

## Style Designator:

Single row, non-locating, two lip inner ring, cylindrical outer ring, separable
Shelf Life:
N/a
Unit Of Measure:

Demilitarization:
No
Fiig:
A044a0
