Overall Width:

Between 3.5025 inches and 3.5625 inches

Bore Diameter:

Between 4.1325 inches and 4.1337 inches

Overall Outside Diameter:

Between 5.3142 inches and 5.3156 inches

Retainer Fabrication Method:

Molded

Stack Arrangement:

6agzpg6 angular contact bearings

Special Features:

Bore and od copper plated, per ams 2418 0.0001 in. To 0.0003 in. Thk; assembly relationship marking /v/ on od of bearings; same serial no. Permanently marked on all bearing elements

Material:

Steel comp e52100 outer ring

Style Designator:

Stack

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
