Overall Width:

Between 1.1050 inches and 1.1250 inches

Bore Diameter:

Between 4.5267 inches and 4.5273 inches

Overall Outside Diameter:

Between 5.9048 inches and 5.9058 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Molded

Load Direction:

Radial

Bearing Preload Rating:

100.0 pounds

Special Features:

Ybore and od surfaces coppe plate d per ams 2640 0.0001 in. To 0.0003 in. Thk, raceways not to exceed 8 microinches aa, assembly relationship marking v on od surface of bearing elements, same serial no. Permanently marked oneach bearing

Style Designator:

Counterbored outer rings, non-separable, tandem mounting

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
