Overall Width:

Between 1.5050 inches and 1.5100 inches

Bore Diameter:

Between 2.4994 inches and 2.5000 inches

Overall Outside Diameter:

Between 3.7492 inches and 3.7500 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Pressed

Alignment Type:

Rigid

Standard Tolerance Designation:

Afbma standard tolerance for industrial needle bearings

Special Features:

Oil hole and oilgroove in outer ring, oil hole and oil groove in inner ring, mfr standard retainer

Material:

Steel

Style Designator:

Separable inner race, with roller retainer, hardened and ground

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
