Overall Width:

Between 0.4630 inches and 0.4730 inches

Bore Diameter:

Between 0.7298 inches and 0.7302 inches

Overall Outside Diameter:

Between 1.3745 inches and 1.3749 inches

Surface Finish:

Ground

Load Direction:

Radial

Bore Shape:

Straight

Internal Clearance:

0.0002 inches radial and 0.0008 inches radial

Special Features:

Flange on extended outer ring of bearing on the loading groove side, flange slotted 0.1240 in. Wide on vertical center line, 4 holes 0.0938 in. Diameter drilled on od of outer ring o.1400/0.1300 in. In from flange, 30 degrees above and below horizontal center line, inner ring counter bored to 0.8070/0.8060 in. Diameter on loading groove side of bearing, opposite side of inner ring chamfered o.0780 in. By 45 deg, bearing heat stabilized to operate at 350 deg, mark outlet on flange face, notch in inner ring bore, 15 degrees from vertical center line, 0.0460 in.

Wide by 0.0060 in. Deep

Material:

Steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
