Overall Width:

Between 0.5856 inches and 0.5906 inches

Bore Diameter:

Between 1.5746 inches and 1.5748 inches

Overall Outside Diameter:

Between 2.6769 inches and 2.6772 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Nonlocating

Internal Clearance:

0.0011 inches radial and 0.0021 inches radial

Standard Tolerance Designation:

Rbec no.5

Special Features:

Silver platted retainer

Material:

Steel comp e52100 roller

Material Specification:

66 federal standard single material response outer ring

Style Designator:

Single row, non-locating, two lip inner ring, cylindrical outer ring, separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
