Overall Width:

Between 0.2495 inches and 0.2500 inches

Bore Diameter:

Between 2.9991 inches and 2.9996 inches

Overall Outside Diameter:

Between 3.5001 inches and 3.5006 inches

Lubrication Material:

Grease

Surface Finish:

Ground

Retainer Fabrication Method:

Pressed

Shield Quantity:

2

Load Direction:

Radial

Bore Shape:

Straight

Internal Clearance:

0.0002 inches radial and 0.0010 inches radial

Special Features:

Nylon strip retainer 4 point contact 30.0 degrees angle, two phenolic laminate shields

Lubrication Material Specification:

Beacon 325, fscm 29700 mfr ref single material response

Material:

Steel outer ring

Style Designator:

40a 4 point ball contact, solid inner and outer rings, non-separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
