Overall Width:

Between 0.7450 inches and 0.7500 inches

Bore Diameter:

Between 0.8134 inches and 0.8143 inches

Overall Outside Diameter:

Between 1.3120 inches and 1.3125 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Pressed

Alignment Type:

Rigid

Standard Tolerance Designation:

Afbma standard tolerance for industrial needle bearings

Special Features:

Oil hole in groove outer ring also mfr standard retainer

Material:

Steel retainer or copper alloy retainer

Style Designator:

Non-separable, with roller retainer, hardened and ground

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
