**Overall Width:**

Between 1.9950 inches and 2.0000 inches

**Bore Diameter:**

Between 4.0012 inches and 4.0024 inches

**Overall Outside Diameter:**

Between 4.9990 inches and 5.0000 inches

**Surface Finish:**

Ground

**Retainer Fabrication Method:**

Pressed

**Alignment Type:**

Rigid

**Standard Tolerance Designation:**

Afbma standard tolerance for industrial needle bearings

**Special Features:**

Oil hole and groove in outer ring also mfr standard retainer

**Material:**

Steel retainer or copper alloy retainer

**Style Designator:**

Non-separable, with roller retainer, hardened and ground

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A044a0
