Overall Width:

Between 0.3700 inches and 0.3750 inches

Bore Diameter:

Between 6.9990 inches and 7.0000 inches

Overall Outside Diameter:

Between 7.7490 inches and 7.7500 inches

Surface Finish:

Ground

Load Direction:

Radial

Bore Shape:

Straight

Internal Fit-up Designation:

Standard

Special Features:

Install bearing with loading notches 180.0 degrees apart, use only for oscillatory applications

Material:

Steel

Style Designator:

40a 4 point ball contact, solid inner and outer rings, non-separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
