Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Nonlocating

Special Features:

Stabilized for operation from m65 degrees f to p450 degrees f

Material:

Steel roller

Material Specification:

Fed-std-66 federal standard single material response roller

Style Designator:

250a single row, non-locating, two lip inner ring, cylindrical outer ring with two roller retainment rings on outer, non-separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
