Rolling Element Diameter:

Between 0.2177 inches and 0.2197 inches

Special Features:

Ball spherical within 0.0002 in., surface finish 32 microinches aa and surface treatment, anodized per ams 2470

Material:

Aluminum

Material Specification:

Ams4118 assn standard single material response

Style Designator:

Ball

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
