Overall Width:

Between 2.9950 inches and 3.0000 inches

Bore Diameter:

Between 4.7480 inches and 4.7490 inches

Overall Outside Diameter:

Between 7.6230 inches and 7.6240 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Two direction

Material:

Steel comp e52100 roller

Material Specification:

66 federal standard single material response outer ring

Style Designator:

252a single row, non-locating, two lip inner ring, cylindrical outer ring, separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
