Overall Width:

Between 0.2450 inches and 0.2500 inches

Bore Diameter:

Between 1.9994 inches and 2.0000 inches

Overall Outside Diameter:

Between 2.4995 inches and 2.5000 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Load Direction:

Radial

Bore Shape:

Straight

Special Features:

Oversize balls to obtain diametral preload of 0.0000 to 0.0005 in.

Material:

Steel comp e52100 outer ring

Material Specification:

66 federal standard single material response outer ring

Style Designator:

40a 4 point ball contact, solid inner and outer rings, non-separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
