Overall Width:

Between 0.4624 inches and 0.4677 inches

Bore Diameter:

Between 0.6690 inches and 0.6693 inches

Overall Outside Diameter:

Between 1.5744 inches and 1.5788 inches

End Application:

Used in lube oil and fuel oil purifier onboard 210 wmec coast guard vessels

Surface Finish:

Ground

Load Direction:

Radial

Bore Shape:

Straight

Internal Clearance:

0.0004 inches radial and 0.0010 inches radial

Special Features:

For high speed application

Material:

Steel comp e52100 outer ring

Style Designator:

40a 4 point ball contact, solid inner and outer rings, non-separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
