Overall Width:

Between 0.7081 inches and 0.7087 inches

Bore Diameter:

Between 1.8700 inches and 1.8705 inches

Overall Outside Diameter:

Between 3.1493 inches and 3.1496 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Nonlocating

Standard Tolerance Designation:

Rbec no.5

Material:

Steel comp m50 roller

Material Specification:

Ams6490 assn standard single material response roller

Style Designator:

250a single row, non-locating, two lip inner ring, cylindrical outer ring with two roller retainment rings on outer, non-separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A044a0
