Overall Width:

Between 0.2400 inches and 0.2500 inches

Bore Diameter:

Between 0.2495 inches and 0.2500 inches

Overall Outside Diameter:

Between 0.4370 inches and 0.4380 inches

Surface Finish:

Ground

Alignment Type:

Rigid

Standard Tolerance Designation:

Afbma standard tolerance for industrial needle bearings

Material:

Steel

Material Specification:

Hynes alloy 25, fscm 60380 mfr ref single material response roller

Surface Treatment:

Nickel shell

Style Designator:

Non-separable, open end, drawn shell

Specification Data:

01359-202803 manufacturers specification control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
