Overall Width:

Between 0.2490 inches and 0.2500 inches

Bore Diameter:

Between 0.7498 inches and 0.7500 inches

Overall Outside Diameter:

Between 1.1873 inches and 1.1875 inches

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Load Direction:

Angular

Bore Shape:

Straight

Internal Clearance:

0.0005 inches radial and 0.0011 inches radial

Standard Tolerance Designation:

Abec no. 5t

Functional Description:

U/o gyro compass, tripartite mine hunter

Material:

Steel comp 440c outer ring

Material Specification:

Plenolic laminate mfr ref single material response retainer

Style Designator:

Loading groove, non-separable

Supplementary Features:

Torque tube series angular contact nonseparable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
