Overall Width:

Between 0.7824 inches and 0.7874 inches

Bore Diameter:

Between 2.9526 inches and 2.9530 inches

Overall Outside Diameter:

Between 4.5270 inches and 4.5274 inches

End Application:

Aft transmission

Surface Finish:

Ground

Retainer Fabrication Method:

Machined

Bore Shape:

Straight

Locating Feature:

Nonlocating

Standard Tolerance Designation:

Rbec no.5

Material:

Steel comp m50 roller

Material Specification:

Ams 6491 assn standard single material response roller

Style Designator:

252a single row, non-locating, two lip inner ring, cylindrical outer ring, separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
