Bore Diameter:

Between 0.6691 inches and 0.6693 inches

Overall Outside Diameter:

Between 1.3699 inches and 1.3704 inches

End Application:

Ama (airframe mounted accessory drive) ; f-18 aircraft

Inner Ring Width:

Between 0.4692 inches and 0.4724 inches

Criticality Code Justification:

Agav

Product Name:

Inner roller bearing, matched pair

Special Features:

This is a matched pair of bearings

Material:

Steel roller

Material Specification:

Ams-6444 assn standard single material response roller

Style Designator:

262a single row, two lip inner ring, no outer ring, roller retainment rings, non-separable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A044a0
