Lubrication Material:

Grease

Alignment Type:

Self-aligning

Product Name:

Mounted bearing

Special Features:

Mounting style: base mount; base mount type: solid; for shaft diameter: 2 inches; dynamic radial load capacity: 9750 lbs; rpm: 2500; abec precision bearing rating: abec-1; housing material: silicone; case iron housing material: plain cast iron; bearing material: steel; temperature range: negative 40 to 356 degree fahrenheit; bearing construction: double sealed; shaft misalignment: 3 degree; secures/attaches with: double set screw; replacement ball bearing insert: 6667k117; bearing is deep grooved and self-aligning; lubricated with dow corning molykote 44 grease; has a grease fitting in the housing for easy lubrication

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A044a0
