Bore Diameter:

Between 2.9055 inches and 2.9065 inches

End Application:

B-1bacft

Outer Member Outside Diameter:

Between 3.7490 inches and 3.7500 inches

Outer Member Width:

Between 0.9950 inches and 1.0000 inches

Inner Member Width:

1.2500 inches

Lubrication Feature:

Self-lubricating liner race liner

Product Name:

Bearing, structural mode control vane-outboard

Special Features:

Mark caution sealed bearing-do not misalig (cross) ball more than(2) two degrees

Material:

Steel comp xm-13 outer race member

Surface Treatment:

Passivate outer race member

Style Designator:

With insert and/or liner

Supplementary Features:

Recessed seals with sheilds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A045a0
