Overall Width:

14.0 millimeters

Bore Diameter:

4.0 millimeters

End Application:

Lw155 howitzer

Product Name:

Bearing, plain

Functional Description:

Split bearing intended for the retention of grease and is supplied in a prefinished condition; reduces friction and wear of the working journal, with marginal lubrication

Material:

Bronze leaded and plastic and steel

Supplementary Features:

Oper temp range: -40 to +130 degrees c; material is composite, porous bronze sinter bonded to a steel backing and impregnated and lined with an acetal copolymer bearing surface; operating loads of up to 140n/mm2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A045a0
