End Application:

Harrier; inner/outer

Product Name:

Inavy: bushing, sleeve

Special Features:

Material: beryllium copper, alloy c17200, temper tf00; id=0.4325 inch; od=0.4994; length=0.490; groove=0.4334; od and ends of bushings shall be coated with ion vapor deposited, high purity aluminum iaw mil-c-83488, type ii, class 3; these bushings are intended for permanent installation in lugs by the anvil staking process.

Material:

Copper alloy body

Material Specification:

B196 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A045a0
