**End Application:**

Harrier; inner/outer

**Product Name:**

Inavy: bushing, sleeve

**Special Features:**

Material: beryllium copper, alloy c17200, temper tf00; id=0.4325 inch; od=0.4994; length=0.490; groove=0.4334; od and ends of bushings shall be coated with ion vapor deposited, high purity aluminum iaw mil-c-83488, type ii, class 3; these bushings are intended for permanent installation in lugs by the anvil staking process.

**Material:**

Copper alloy body

**Material Specification:**

B196 assn standard single material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A045a0
