Hole Diameter:

0.1000 inches and 0.1030 inches first

Overall Length:

0.2500 inches

Body Outside Diameter:

3.5000 inches

Body Inside Diameter:

2.2600 inches

End Application:

A-10 aircraft

Antirotation/lubrication Type And Quantity:

2 hole

Product Name:

Bearing half-polytetrafluoroethylene lined, flap torque shaft support

Special Features:

Three flats opposite i.D., two mounting holes 1.445 in. From centerline in -7 only

Material:

Plastic polytetrafluoroethylene inner layer

Relationship To Similar Equipment:

Similar to 160c724318-3 hole spacing different

Style Designator:

17d half sleeve, plain, no outside flanges

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A045a0
