Bore Diameter:

Between 10.8975 inches and 10.8985 inches

Housing Diameter:

Between 10.615 inches and 10.620 inches

Housing Length:

3.750 inches

End Application:

Kc135

Criticality Code Justification:

Feat

Product Name:

Bearing assembly-upper shock strut assembly-main landing gear

Special Features:

This item has multiple critical dimensions, materials and processes necessary for proper function

Material:

Copper alloy

Material Specification:

Ams4881 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A093a0
