Mounting Type:

Base

Arc Current Type:

Ac

Voltage In Volts:

115.0

Phase:

Single

Special Features:

Designed primarily for cc dc power sources.Used with cv power source or dc engine drives supplying 115vac.Used with cc source, control circuit functions in a voltage-sensing mode.Used with cv source functions as a constant-speed circuit.Includes wire run-in control, drive motor acceleration control.Comes with 10ft wall-type plug power cord and 14pin contactor cord

Frequency In Hertz:

60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T345-a
