Diameter:

0.050 inches

Physical Form:

Wire

Chemical Composition Percentage:

Tin 62.5 to 63.5 per cent, antimony 0.20 to 0.50 per cent, bismuth 0.25 per cent max, copper 0.08 per cent max, iron 0.02 per cent max, zinc 0.005 per cent max, aluminium 0.005 per cent max, arsenic 0.03 per cent max, others 0.08 per cent max, lead - remainder

Content Within Each Unit Package:

1 lb

Wire Core Type:

Rosin

Special Features:

Plastic flux-cored, 1.1 nominal flux percentage

Specification Or Standard:

Sn63 composition or w form and r type and p condition and 1 size

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-c
