Environmental Protection:

Abrasion resistant and corrosion resistant

Content Within Each Unit Package:

2.5 lb

Criticality Code Justification:

Feat

Special Features:

Composition: magnesium zirconate and nickel aluminum; used in graded coating systems for thermal barriers with high resistance to thermal shock; the graded coating systems are being applied on the combustion chambers (burner cans) of jet engines; should be sprayed with metco plasma flame spray equipment; unit package type is a container; certification: pwa1341c; rr9507/25 iss 2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-s
