Environmental Protection:

Abrasion resistant and corrosion resistant

Content Within Each Unit Package:

2.500 lb

Criticality Code Justification:

Feat

Special Features:

Composition: pre-stabilized magnesium zirconate powder; excellent high temperature thermal barrier; can be sprayed with metco thermospa6y equipment and with the metco type 3mb, 7mb, 9mb, 10mb, 11mb plasma spray guns; typical applications; missile nose cones, brazing and heat treat fixtures, aircraft engine burning cans, galvanizing dip tanks, pouring troughs, molds, troughs; unit package type is a container; note: same chemistry as metco 210ns-1 with a modified particle size distribution; certification: b50tf155-s3, cla

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
