Environmental Protection:

Corrosion resistant

Basic Material:

Graphite and nickel

Content Within Each Unit Package:

5 lb

Criticality Code Justification:

Feat

Special Features:

Nickel graphit cermet powders for producing abradable coatings in machine element clearance control applications, particularly in the compressor sections of aircraft jet engines; can be used in service temperatures of 900 degrees f ; metco 308ns, 308ns-1 and 308ns-3 are chemically identical and both fall within the typical size range; difference between them is in the distribution of particle sizes within the range; can be sprayed with metco type 5p, 6p, or 6p-ii thermospray gun; type 6p or typ 6p-ii should be used to assure a consistently high level of coating quality; unit of issue is container; certification: pwa1352-2; fb5045, type xi, rev ab

Reference Number Differentiating Characteristics:

As differentiated by special features

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
