Environmental Protection:

Any acceptable

Basic Material:

Magnesium alloy

Content Within Each Unit Package:

5 lb

Criticality Code Justification:

Feat

Special Features:

Unit package type is container; magnesium stabilized zirconium oxide powder, widely used in the aircraft engine industry for thermal barrier coatings. coatings exhibit outstanding resistance to thermal shock and particle erosion; strength 1200 psi typical; grind only, use silicon carbide or diamond wheels; certification: pwa 1333

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-s
