Environmental Protection:

Any acceptable

Basic Material:

Nickel alloy

Content Within Each Unit Package:

12.5 lb

Criticality Code Justification:

Feat

Special Features:

Unit package type is container; nickel clad aluminum composite powder. Reacts exothermically during spraying to form metallurgical bonds with all substrates except copper and its alloys. coatings are tight, dense; resistant to temperatures to 1800 degrees fahrenheit; coarse finish as sprayed; grinds good; certification: pwa 1321

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
